

Landwave Facility Standards Development Services

Meeting the wave of emerging technologies, regulatory requirements and design practices in a timely fashion places serious strain on facilities communities. Unless, of course, you are organized. Developing and maintaining a usable knowledge base of best practices allows your design, construction and O&M teams to focus on optimizing services and performance rather than playing catch up to basic services delivery. Landwave has long experience helping owners, their designers and constructors build the right things quickly through identifying and standardizing routine items. We develop thorough and easy to use guides for all audiences in the facilities development lifecycle.

Landwave provides services to firms with public contracts looking to do more with resources at hand.

Past Performance

Regulatory, Mission and Energy Upgrades, multiple sites
 US Postal Service, US Army Corps of Engineers

Bank Merger Retail & Training Rollouts
 Multiple sites, 5 major mergers, First Union National Bank, Branch Banking & Trust
