

Landwave Business Transformation Services

Ubiquitous technologies overwhelm organizations with information, opportunities and new operational paradigms. Many organizations find themselves drifting farther from their core strengths and operational potential. Additionally, emerging mission requirements, best practices, budgeting, regulatory constraints and a workforce in transition create difficult conditions for organizations to adapt. While most organizations strive for continuous process improvement, many find themselves standing still or sliding backwards in operational capability.

Landwave and its partners provide rational frameworks and business process management techniques to help organizations stay focused on mission, take advantage of emerging conditions and achieve the excellence they seek.

Landwave provides services to firms with public contracts looking to do more with resources at hand.

Past Performance

Mission Critical Application Alignment

Little & Associates Architects, Charlotte , NC

LCO QA Program

Rollout of 500+ Local Census Offices, 2010 Census, US Census Bureau
